

6516207648.txt

I'm a business owner, employing over 100 people and a father of 2. I listen to XM radio, and haven't listened to FM or AM band stations in over a year. The quality of XM radio has set a new high water mark for providing an excellent and extremely diverse broadcast of audio material. XM provides quality and service that is not available from terrestrial broadcasters and I am against any restrictions on the data that they are able to make available to me.

Please reject NAB's petition 04-160 - this is not in the interest of today's consumers.

Respectfully,
Mark Surfas
